

The Romantic Bedroom

Design Instructions

- (1) Sprinkle the silk rose petals on the bed using about one and a half of the packs. It usually works best to drop them for a height of about 3 feet above the bed instead of placing them individually (faster too!). Take out the red feather boa and place it at the foot of the bed (or the head of the bed – whichever you prefer). We usually place it in a serpentine style at the foot of the bed (~~).
- (2) The remaining silk rose petals can either be used to form a trail from the front door to the bed or, if the bed is very close to the door, use the remaining petals on the nightstand to surround the candles.
- (3) Place the candles on the nightstand. If using the LED flicker votives, they can be turned on now by either rotating the dial underneath the candle or flipping the switch or pushing the button (in some cases there is a piece of red tape on the bottom that needs to first be pulled out). Arrange candles in any way you see fit – we usually stagger them a bit. If real candles are being used, DO NOT PRE-LIGHT THEM. It is up to the guest or recipient to light their own candles upon arrival.
- (4) Next, on the bed, drape (or unroll) the fabric tulle up and down the bed starting from the head of the bed to the foot of the bed and back again several times (kind of like a “VVV” like pattern). You can also drape some of the tulle over the pillows in the same manner.
- (5) Take the pearl beads and place the strands on the bed. Again, it is up to you – we normally place them in a wave like pattern across the center of the bed.
- (6) Take the metallic streamers and unroll them (but do not stretch them out to far or they will lose their “curl” and place them from the head of the bed to the front of the bed. Use your discretion for any sort of a pattern (e.g. diagonal, straight across).
- (7) Blow up the balloons and place them all around the bed. We would normally place 2 of the reds at the head of the bed, one red in the middle and the two white ones at the corners of the foot of the bed. The red heart balloon can be placed on the very top of the pillows.
- (8) The red heart confetti can be spread around the candles on the nightstand to help reflect the light.
 - The hat box lid can be placed back on the base and the box can be placed on the nightstand in front of the candles (not too close if using real candles) for display and storage of the design. (Note: The picture below includes a box of chocolate and Hershey’s Kisses which are not included in this package)
